

# Installation on Ubuntu Server 22.04

## Install Apache Webserver and PHP

```
apt -y install apache2 php php-cgi libapache2-mod-php php-mbstring php-common php-pear
```

Then enable php-cgi PHP extension:

```
a2enconf php*-cgi  
systemctl reload apache2
```

## Install LDAP Account Manager

```
apt -y install ldap-account-manager
```

The account manager is available on <http://lam.simmy.ch/lam>.
